

LUGER'S

— SUPERFOOD —

Luger's wet dog food can be given to all dog breeds. Its specially selected composition is particularly suitable for pets with gastric problems and indigestion, as it contains no cereals. The essential amino acids and fatty acids in the food are provided by deer, turkey, lamb and beef meat. The addition of salmon and flaxseed oils provides correct amount of n-3 fatty acids. It is supplemented with fruit and vegetables, providing vitamins and minerals, as well as psyllium seeds and brewer's yeast, which ensure proper metabolism.

Luger's wet dog food is a unique dish that covers 100% of the daily demand for all nutrients, minerals, vitamins and biologically active substances for adult dogs. The food is free from preservatives, colourings or attractants. High proportion of meat and offal in the form of beef, pork and chicken (70%) makes Luger's pet food a highly digestible meal which is recommended for all dogs. What is more, these raw materials are 'human grade' quality, i.e. intended for human consumption. The ingredients used in this product are of high nutritional value due to the content of fatty acids, both from the n-6 and n-3 family, and correct proportions between EPA and DHA. The meat species which constitute the basis of the recipe, ensure the presence of wholesome protein with high digestibility. Minerals and vitamins are present in the best-absorbed form. Thanks to the precise selection of raw materials Luger's wet dog food is easy to digest, perfectly suited to the diet of an adult dog and, above all, a sensory feast for the dog's palate!
