

In the northern part of the Wielkopolska province right beside the highest hill, Dębowa Góra, amidst picturesque countryside, Dolina Noteci – one of the most modern pet food production plants in Europe is situated. The name itself reflects not only the rural location of the company, but also its activity which are a healthy lifestyle and properly combined food for pets, made with love. The pet food is made up of the best raw materials, high-quality products, fresh fruit and vegetables from local suppliers. Thanks to the gifts of nature offered by this clean region, the pet food produced at Dolina Noteci satisfies even the most sophisticated animal palate. Most importantly, the whole process may be viewed by anyone, as the facility has been adapted for being visited

## Dolina Noteci<sup>®</sup> PREMIUM

Dolina Noteci Premium for cats are products which meet the specific nutritional requirements of kittens and adult cats, including gibcats. They are available in a variety of flavours as well as an appetising moist consistency which helps maintain proper hydration levels in cat's body. The products are minimally processed, which is only necessary to maintain microbiological safety. As a result, they retain maximum nutritional value. The food covers 100% of daily nutritional, mineral and vitamin intake as well as functional substances (taurine and fatty acids) for pets. They are distinguished by high content of meat and animal products. By stimulating all metabolic processes, Dolina Noteci Premium wet pet food for cats ensures a stable body weight without nutrient deficiencies. Valuable substances contained in it promote pet's health and well-being.

# Dolina Noteci PREMIUM

These products contain perfectly balanced minerals and vitamins and are based on modern nutritional standards. They guarantee correct mineralisation of bones and teeth and ensure that all metabolic processes run smoothly. They provide right balance of minerals (calcium to phosphorus ratio is 1.28:1), which guarantees correct growth and development of the body. They are based on meat raw materials, so the digestibility of the protein is estimated at 90-95%. The overall fat content of the food does not exceed 10%, so they are recommended for all animals. Bioactive compounds from basil, brown rice, carrots and linseed oil guarantee proper metabolic processes. In addition, these raw materials, when combined, help improve absorption of other nutrients and enhance palatability of the pet food.

# Dolina Noteci PREMIUM Pure

Their composition is based on a single source of animal protein needed to maintain healthy and strong bones. They are recommended for dogs that show symptoms of food allergy. Appropriately selected composition guarantees that there is no allergy-causing protein. This pet food, based on a single source of protein, fits in with the dietary recommendations related to elimination diets. It is a great alternative for the carer to ascertain whether the symptoms after ingestion of a particular protein are indeed symptoms of a food allergy.

# Dolina Noteci PREMIUM JUNIOR

These products are formulated following modern standards and dietary recommendations for proper nutrition of puppies and young dogs of medium and large breeds. The composition ensures adequate mineralisation of bones and teeth and, by stimulating all metabolic processes, good growth and development. Addition of yeast containing beta-glucans is a perfect supplement to the diet of puppies with valuable ingredients of a prebiotic nature, which guarantee correct growth and stimulation of gastric digestive processes.
